khampheeraphop.thon@gmail.com

SUMMARY

Information Technology and Digital Innovation student with two years of internship experience in Full Stack Development. Contributed to production applications for clients and internal teams using React, TypeScript, MUI, Node.js, MongoDB, and PostgreSQL. Experienced in microservices, dynamic forms, document workflows, points and rewards systems, and external service integrations. Worked in sprint-based teams, performed end-to-end testing during QA and UAT, and resolved production issues.

WORK EXPERIENCE

FullStack Developer Intern | Blueseas Enterprise Co., Ltd. **November 2024 – Present**

NSM E-Portfolio

- Developed frontend and backend features for activity and competition configuration, certificates, form builders, and evaluation forms.
- Implemented user interfaces from Figma designs, including activity listings, registration, portfolios, certificates, and user profiles.
- Performed end-to-end testing before delivery, documented defects, and resolved more than 50 issues.

Siriraj Event

- Developed frontend and backend features for event creation and event details, including countdown timers and a socket-based waiting queue.
- Contributed to zone selection, price calculation, and payment information and QR code displays.
- Wrote unit tests for application functions and collaborated with business analysts and QA engineers to resolve more than 100 issues.

Siriraj Give Phase 2

- Developed frontend and backend features for administrators and users, covering login, registration, gift configuration, inventory, and shipping.
- Built gift redemption forms and payment interfaces, along with responsive pages for donation funds, donation locations, donor services, and benefits.
- Resolved more than 100 bugs and issues reported during production use.

Oi Dee — Sugarcane Leaf Screening Prototype

- Developed data preparation, training, and evaluation workflows for a MobileNetV3-based model using PyTorch, with image quality checks and result withholding when evidence was insufficient.

EDUCATION

June 2023 – Present

Bachelor of Science in Information Technology and Digital Innovation
North Bangkok University
Faculty of Information Technology and Digital Innovation
GPA: 3.89

SKILL

- **Frontend:** React, Next.js, TypeScript, MUI, Responsive Design
- **Backend:** NodeJs, TypeScript, Python, Line Liff, Line message
- **Database:** PostgreSQL, SQL, Redis, MongoDB, Elastic Search, Store Procedure
- **Tool & Deployment:** Git, GitLab, Docker, Harbor, Jenkins, Termius
- **Testing & Collaboration:** Full loop Testing, QA/UAT, Sprint Planning & Review
